It appears there are only three cases in the Hygeia from the Orontes, and that there are nine cases in the Lazarette on Stonecutter's Island under observation. With reference to the nationality of the Brapress Dowager we are told that there was a story current among the Chinese in Tientsin that she is not a Mancha at all, but a Cantenese; who was adopted when quite young by a Manchu family in Canton; and her liberality and the vigour of her intellect and breadth of her views are said to be due to this In feature, according to Chen Pak-nam, who died a director of the China Merchants, she is much more like a foreigner than a Chinese, with a prominent nose and very piercing eyes: he was never tired of saying that she is " very clever, all same foreign man, very quick eye see eterything."-Shanghai Mercury.

THE police in Shanghai have made a smart capture in getting back three bars of gold worth \$1,050 such, which were lately stolen off the Yeasin in Chemulpo. . Six bars of the precious nietal were there brought on board by an individual who must have been the most careless of mortals, for he appears to have gone on shore again immediately without putting the gold into safe keeping: Someone else, however, appears to have been much more careful than the owner of the gold, for no sooner was the owner's back turned then a thief succeeded in carrying off the six bars. The police believe that he must have given one bar to a sailor on the vessel to "shut his mouth, for they got a bar amongst the effects of the men when the vessel last arrived in Shanghai. A detective was also sent from here to Chefoo where two more bars were recovered. But the other three bars have not been secovered yet .- Mercury.

cheap fuel. That the promoters are apparently conddent they are in a position to meet

these requirements. That as the fuel is of an authracitic charac-

IT RECALLS THE BLIZZ RD. In Murch, 1888, the great blizzard in America almost extinguished the city of New York. The like of it was never before seen. The snow completely stopped all local traffic. Not a horse or a wheel could move. All the telegraph lines leading into the city were prostrated, and for two or three days the people of Boston and New York communicated with each other by way of London by means of the Atlantic cables. Thus messages intended for persons three hundred miles distant were sent six thousand miles, crossing the

The letter from which the foregoing is an extract is signed Moses Godwin, Old Bodbury (Sodbury), Glos, and is dat di April 9th, 1891. He is a farmer.
